Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Luciano U.S. Patent 6,101,367.

Luciano disclosed in Figs. 2 and 3 a key ring (22), an educational key tag (11) having means for attaching the tag to the ring, the tag additionally presenting an educational challenge (a mathematical question). An appropriate response to the challenge presented by the tag (an answer).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luciano in view of Shea U.S. Patent 5,492,473.

In re claim 3, it is noted that the educational challenge and response of Luciano appear on the same side on the tag (11) instead of the manner as set forth in claim 3. However, Shea teaches an education apparatus comprising card (20) having a question

Art Unit: 3712

(20a) on one side and an answer (20b) on the other side as shown in Fig. 8 (see column 4, lines 35-36). Therefore, it would have been obvious to one of ordinary skill in the art to modify the tag of Luciano with the education challenge on one side and the response on the other side as taught by Shea for the advantage of allowing a user to think and/or analyze the challenge before providing an answer.

In re claims 7-10, Luciano also suggested that other subject matter besides mathematics such as grammar, history, geography, mystery can be used with the disclosed system. Therefore, it would have been obvious to one of ordinary skill in the art to modify the teaching method of Luciano with the language instructional and fact recognition apparatus of Shea for the advantage of expanding the teaching subject.

Claims 4-6 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luciano.

Luciano failed to specifically disclosed the material, a spirally wound resilient metal key and a key as set forth in these claims. However, regarding the spirally wound resilient metal and key, such features are very known in the art as evidenced by the enclosed references. Therefore, it would have been a matter of design choice to modify the key chain of Luciano with any conventional key chain.

Regarding claims 4-6, Luciano employs a rather high-tech approach to the education apparatus by using the digital display (21) and microprocessor chips (17). However, it would have been a matter of design choice to manufacture the display (21) with less expansive material such as a reinforced polymeric composition, and paper with polymer laminate for the advantage of reducing the cost.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The enclosed references show a variety of key chain attachment and language teaching system.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
